Floraville Public School

Welcome to our School

Floraville Public School has a proud tradition of excellence in teaching and learning. With an exceptional team of teachers and support staff, the school has developed an outstanding reputation in the local community.

The school offers an engaging, supportive, caring place to learn, where students are given encouragement and direction to achieve their best.

Our vision is to provide excellence and equity in education, empowering students as creative, confident learners and active, informed citizens.

"Being new to the school, I'm completely impressed with all I have experienced, and all that I see happening, at Floraville Public School."

Excellence in Teaching

Our core business at school is teaching and learning, with a strong focus on literacy and numeracy. A whole-school approach to the teaching of reading, writing, spelling and grammar, guides the learning progressions for every child. Student achievement is measured against a continuum of skills for literacy and numeracy which determine the next steps for student progression. Parents are active partners in school programs.

Excellence in Learning

Children develop at different rates and learn in different ways. It is our responsibility to cater for the needs and learning styles of every child. We also develop the capacity of students to take responsibility for their own learning. We teach students to reflect on, and evaluate, the strategies they use and identify their own areas for growth and development. Students benefit from outstanding digital resources across the school and confidently engage with technology as a tool for learning. The school has significant programs for sport, student leadership and creative & performing arts.

The school Learning Support Team utilises the expertise of specific members of staff in catering for individual students. The team has oversight for:

- learning support programs
- gifted and talented initiatives
- collaboration with external health agencies and professional organisations

Excellence in Wellbeing

Our school Kids' Matter team, lead initiatives which promote positive health and wellbeing. While our vision is for students as creative, confident *learners*, we also seek to develop students as active, informed *citizens*. This belief is supported by a strong values program, which promotes the qualities of:

- Confidence
- Persistence
- Getting Along
- Quality
- Organisation
- Resilience

These are the core values for our school.
